

**ABSTRACT OF THE DISCLOSURE**

A deck of game playing cards is disclosed containing approximately 104 playing cards, each card having a back side which is similar to each of the other playing cards such that the cards cannot be distinguished by observing the back side, and a front side containing an indication of location, quantity and suit, such that when a first playing card is placed adjacent to a second playing card, the combination results in a playing card similar to a standard playing card, but approximately twice the size of the standard playing card.
